Project: <https://travel-mate---v-2.web.app/>

Professional Summary

Frontend developer with experience building responsive and user-focused web applications, with growing backend development skills in Python and Node.js. Experienced in deploying applications using Firebase and working with Git-based workflows and CI/CD pipelines. Interested in secure software development and building scalable systems.

Technical Skills

Frontend: HTML5, CSS3, Bootstrap, JavaScript

Backend: Node.js, Python (learning and practical exposure)

Cloud & Deployment: Firebase Hosting, Firestore, Authentication

Tools: Git, GitHub, CI/CD Pipelines

Database: PostgreSQL, Firestore

Security: Linux, OWASP Principles, Secure Authentication

Projects

TravelMate V2

Revamped travel planning web application with improved UI/UX and modern structure. Deployed using Firebase Hosting. Integrated authentication and structured workflows. Used Git and CI/CD pipelines for development and deployment. Live: <https://travel-mate---v-2.web.app/>

RentEase (In Development)

Property management platform focused on booking and rent automation. Contributing to frontend development and backend security testing.

TrailSMS

Backend SMS system using Africa's Talking API with webhook handling and delivery workflows. GitHub: <https://github.com/elvinkevin>

Jumia Database Schema

Designed scalable PostgreSQL schema for e-commerce systems with focus on ACID compliance.
GitHub: <https://github.com/elvinkevin>

Education

Bachelor's Degree in Information Security (Ongoing)

Certifications

Cybersecurity | Software Development | SEO Optimization
